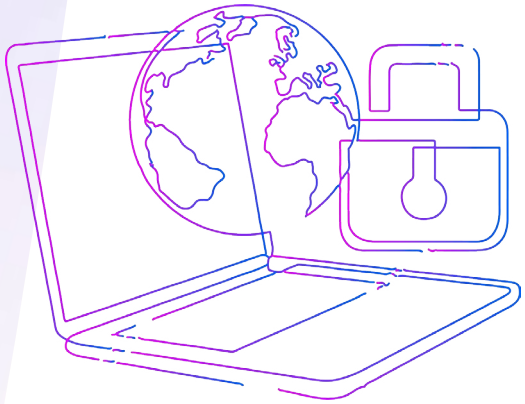
VGS | The World's Leader in Payment Tokenization | aws

Transforming the Payment Experience for Travel & Hospitality



A Joint Solution for Secure, Scalable Transactions

In today's fast-paced travel and hospitality sector, delivering a seamless, secure, and efficient payment experience is critical to upholding consumer trust and driving revenue. Through a powerful joint solution, VGS and Amazon Web Services (AWS) are empowering travel and hospitality businesses to elevate payment outcomes by securely managing sensitive card data, reducing transaction failures, and optimizing authorization rates. VGS's industry-leading payment tokenization and vault technology, combined with AWS's scalable cloud infrastructure, ensures robust data security and complies with PCI DSS, GDPR, and CCPA regulations, providing peace of mind for organizations handling vast volumes of customer information.

By purchasing VGS through AWS Marketplace, travel and hospitality providers can benefit from a streamlined procurement process, simplified integration through VGS's single API, and enhanced operational agility. This comprehensive solution allows companies to securely manage payments across card networks, processors, and service providers, helping consolidate vendor services and reduce costs. With global scalability and robust enterprise data security, VGS and AWS help travel and hospitality companies to deliver frictionless payment experiences that align with evolving customer expectations.

Comprehensive Payment Security and Operational Agility

VGS offers a single-API Card Management Platform that provides travel and hospitality providers with centralized access to network-provided value-added services like Account Updater, Network Tokens, and full-PAN Card Attributes. Travel and hospitality companies can use VGS's industry-leading payment tokenization and vault technology to protect sensitive customer information, securely leverage payments data, and maintain PCI DSS, GDPR, and CCPA compliance.

Available through AWS Marketplace, VGS offers a streamlined procurement process and maximizes AWS spending commitments, making it an ideal solution for managing travel and hospitality payment complexities. The VGS and AWS partnership empowers businesses to handle high transaction volumes, uphold regulatory compliance, and deliver seamless, secure payment experiences. Key benefits include:

Security and Compliance

VGS safeguards sensitive payment data with tokenization, encryption, and vaulting, reducing fraud risk and ensuring compliance with PCI DSS, PCI DSS 4.0, PII, and GDPR standards—securely supporting seamless, compliant operations across platforms.

Optimization and Integration

VGS's Card Management Platform enables payments by securely storing and enriching data across processors and service providers, reducing transaction failures and costs while improving efficiency and ensuring security within AWS workloads.

Scalability and Cloud Migration

VGS unlocks migration of sensitive workloads to AWS, enabling cloud scalability while preserving security and compliance. VGS's payment tokenization supports seamless integration, operational continuity, and scalable payment systems without re-architecting legacy applications.

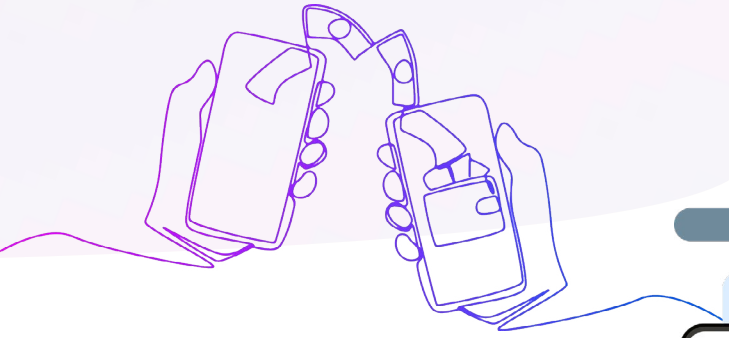
aws

Transform your Payment Experience



Travel & Hospitality Company Leveraging VGS

Fivestars partnered with VGS to enhance its loyalty platform, achieving PCI compliance and saving nearly $1M and six months in development. This partnership enabled Fivestars to link payments with loyalty seamlessly, engage over 60 million members, and help 14,000 merchants boost customer return rates post-COVID by 2x over non-users.

Securely Manage Payment Complexities with VGS and AWS.

The VGS and AWS partnership provides travel and hospitality organizations a robust solution to transform your payment experience, ensuring security, compliance, and operational efficiency.

By utilizing VGS's payment tokenization and AWS's scalable infrastructure, businesses can optimize payment outcomes, streamline integration, and confidently manage compliance across global markets.

With the support of AWS Marketplace, travel and hospitality companies have a unified, reliable payment infrastructure management solution designed to meet industry demands, enhance customer trust, and drive sustainable growth.
